INTRO CORPS ANIMATION (:05)	
<p>EXT. BEACH</p> <p>BILLY and PENELOPE are relaxing on the beach.</p> <p>ANIMATION of a boat in the ocean dropping a rover into the water.</p>	<p><u>BILLY</u> Woah! Penelope, do you see that?</p> <p><u>PENELOPE</u> Yeah! That boat just dropped a box into the ocean.</p> <p><u>BILLY</u> Let's ask our friend, [NAME], from the Ball State Digital Corps if [PRONOUN] knows what that box is!</p>
TRANSITION (:03)	

INT. BEACH HUT	<p><u>CORPS STUDENT</u></p> <p>Hi there! That boat did not drop a box into the water; it's actually a deep sea rover. Deep sea rovers crawl along the ocean floor to collect information for scientists.</p>
ANIMATION of a rover moving along the ocean floor.	<p><u>CORPS STUDENT</u></p> <p>Deep sea rovers are very important. They help us learn more about how deeper layers of the ocean are different from what you see on the surface of the water.</p>
ANIMATION of fish and other underwater animals moving out of the rover's way.	<p><u>CORPS STUDENT</u></p> <p>Deep sea rovers carry different tools that measure things like oxygen levels and what foods deep sea creatures eat. I hope that helps!</p>
TRANSITION (:03)	
EXT. BEACH BILLY and PENELOPE head towards the ocean water.	<p><u>BILLY</u></p> <p>Wow! Deep sea rovers are a great tool for scientists to use so they can learn about the ocean.</p> <p><u>PENELOPE</u></p> <p>There's a lot of ocean to explore. Let's dive in!</p>
OUTRO CORPS ANIMATION (:05)
