DRAFT: OCTOBER 24, 2019

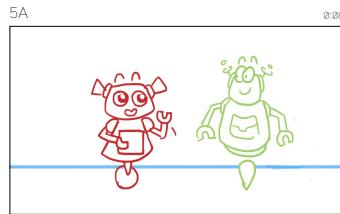

Penelope rolls on to screen holding a package. Billy flies over to her.

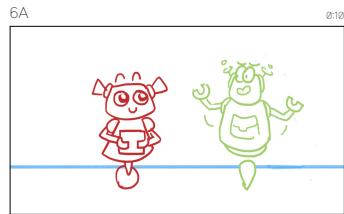

Penelope rolls on to screen holding a package. Billy flies over to her.

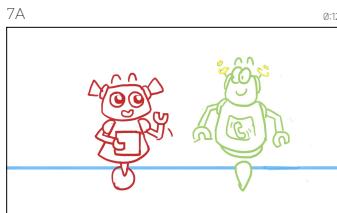

Billy: Hey Penelope. What's in the box?

Penelope: Just some new books. My Mom ordered them for me yesterday. I can't believe they are already here!

Billy: I wonder how packages get here so fast.

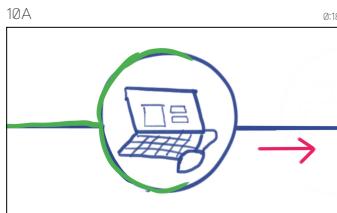

Penelope: Let's ask our friend EMPLOYEE at the Ball State Digital Corps.

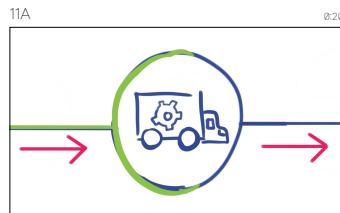

Zoom into Billy's stomach to reveal EMPLOYEE standing in the living room.

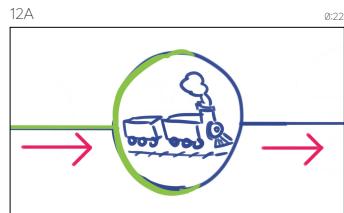

Employee: Hey you two! Delivery services can get items to you super fast. There is a system to help move everything along.

Employee: For example, a grown-up can order a toy for you online. The toy company uses an address to know where the toy needs to go. The toy can travel in a truck, a train, or even an airplane before it ends up at your front door. All kinds of things, like clothes, electronics, and even food can be delivered. Some delivery so it can get there fast!

Animation: A computer, factory, truck, and home are all lined up. A line connects them all. As the process is explained, a surge goes through each icon and through the line representing the journey of the package.

Employee: Your parents can help you if you ever want something delivered. I hope that helps!

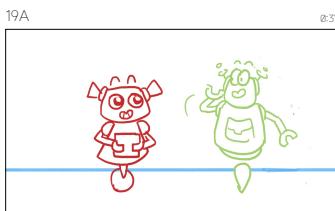

Zoom out of Billy's stomach.

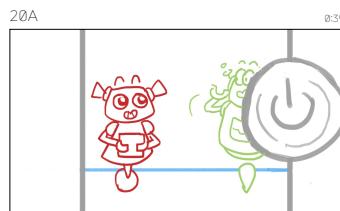

Billy: Wow! I'm gonna ask my mom to order some new toys right now.

Penelope: Do you need new toys though Billy?

Billy: I might. We will find out tomorrow when they get here!
